# Technology Enabled Care Model Innovation
The Leadership Institute March 2017

Introducing the Missing Link in Telehealth

A Comprehensive Medical Exam. Anytime. Anywhere.

tytocare™
Health is in your hands

Heart Exam
High quality digital audio captures heart rate and rhythm to help clinicians identify murmurs and other cardiology conditions

Lung Exam
Stethoscope attachment enables clinicians to hear and diagnose whether it's a cold, asthma, bronchitis or something more serious

Ear Exam
High resolution images of the canal and membrane enable clinician diagnosis of ear infections

Skin Exam
High resolution digital images of moles, rashes, eczema, and other skin lesions inform dermatology diagnoses

Throat Exam
Tongue depressor attachment makes it easy to capture clear images to help clinicians diagnose simple infections or strep throat

Eye Exam
High resolution digital images help clinicians diagnose infections or pink eye

Temperature Exam
A simple swipe across the forehead provides an accurate temperature reading

In the Home.
In the Clinic.

TytoCare is connecting consumers and clinicians like never before.

Telehealth is here. But how can clinicians reliably diagnosis an ear infection, sore throat, or heart palpitations when their patients are miles away? Now they can with TytoCare, the only digital device and platform that captures and records vital examination data with high quality digital images and sounds, enabling a complete remote examination from home.

Temperature and Skin   Heart and Lungs   Throat Imaging   Ear Imaging

TytoHome™

A check-up without the check-in.

Only TytoHome gives patients the tools they need to:

- n Perform a comprehensive exam at home
- n Share exam results remotely with a physician for a quick, convenient diagnosis
- n Store and compare results over time

Proprietary guidance technology ensures patients capture and share accurate exam results with their physicians, so they can be confident that the remote diagnosis is the right diagnosis.

TytoPro™

Connecting with patients in the clinic.

Designed for professional use, TytoPro enables clinicians to:

- n Examine, capture, and share images with patients to explain diagnosis and motivate treatment
- n Download to patient EHR for continuity of care and disease tracking
- n Extend services to remote locations such as home visits, employer work sites, and urgent care clinics
- n Get a quick and easy second opinion or a specialist consult

---

TytoCare Platform

Advanced. Flexible. Secure.

TytoCare's flexible telehealth platform can easily integrate into existing EHR and telehealth systems or provide a complete, end-to-end telehealth solution.

TytoCare's advanced cloud platform provides:

- n A comprehensive telehealth visit with live video conferencing or store & forward
- n Scheduling, patient questionnaires, and e-prescriptions
- n Seamless integration with existing EHR systems
- n Easy to use data storage and analytics
- n HIPPA compliance

"I can continue providing care to my patients regardless of where they are – enabling me to do more comprehensive telehealth consultations and virtual visits."

"I can show my patient's parent WHY I'm making the decision I'm making – it builds trust and sets me apart from the competition."

"There is a huge value in being able to compare pictures over time – comparative progressing is significant."
