

Strategic Pharmacy Services Integration

Pharmacy Enterprise to Support the System Mission

Tina Aramaki, PharmD, MBA

Vice-President Pharmacy Services

Banner Health

The Leadership Institute | May 16, 2018

Banner Health

Banner Health is a large, integrated healthcare delivery system that is based in Phoenix, Arizona and maintains operations in seven states (Arizona, California, Colorado, Nevada, Nebraska, and Wyoming). Banner Health includes:

- Twenty-eight acute care facilities
- Behavioral Health Hospital
- Approximately 1500 employed physicians, representing a broad spectrum of healthcare specialties
- 44 Urgent Care sites
- Homecare and home infusion services
- 18 Retail pharmacies associated with large hospitals and health centers
- Specialty pharmacy services
- Ambulatory clinical pharmacy services
- 49,000 employees

Banner Pharmacy Services – Senior Operations Team

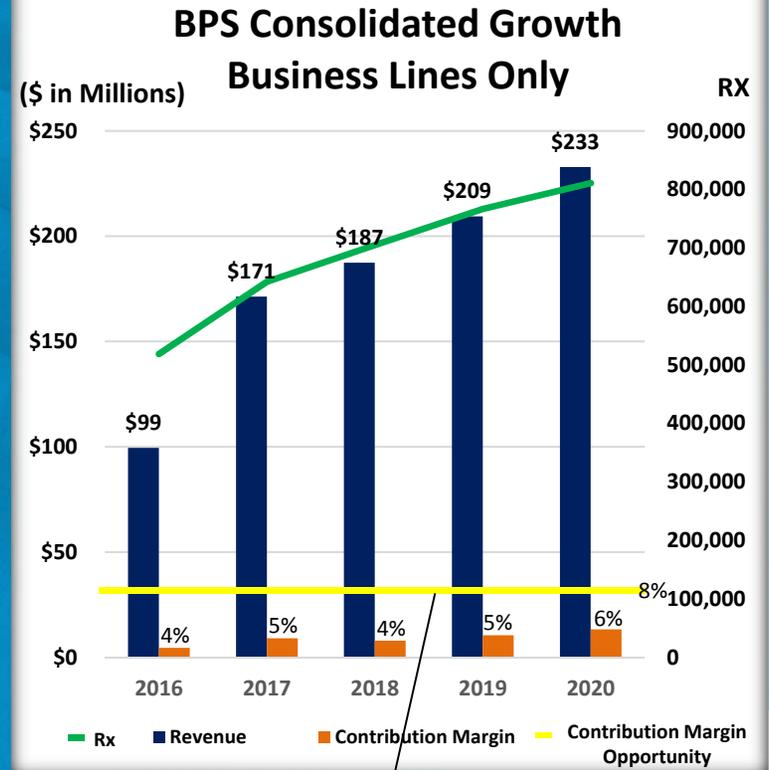

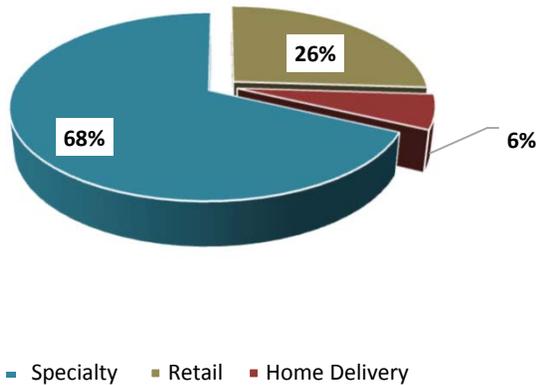

2017 BPS Business Line Structure

Banner Family Pharmacy – Consolidated Growth Business Lines Only

2020 Consolidated SFP Revenue Mix

CM opportunity is based incremental growth of

- \$4M in Retail
- \$0.8M in Home Delivery
- \$8M in Specialty

Banner Family Pharmacy

Benefits to Banner

- New revenue generation and integrated care for Banner service sites
- Convenience, access and keeping employee spend inside Banner

Current Operations

- 17 BFP franchise models in both hospitals and medical group clinics
- Increase Prescription Capture Rates (ICR) program

Startup to Current: Lessons Learned

- Drug margins are slim and revenue is highly dependent on volume

Strategic Direction

- Future Growth and Renovation of BFP Locations
- Non-BFP Facility Prescription Solutions
- Discharge Medication Delivery Program
- Immunization Capability to Complete Gaps in Care
- Increase Prescription Capture Rates (ICR) Program Enhancements

Banner Family Pharmacy - Specialty

Benefits to Banner

- An important aspect of the integrated delivery continuum
- High-touch clinical care and robust patient advocacy program

Current Operations

- Converted outsourced CommCare (an entity of Premier GPO) 1/1/15 to Banner Specialty Pharmacy for 1000 employees; licensed in 6 states
- In Blue Advantage specialty network effective 5/1/15 (100% at risk for pharmacy spend)
- Investor/Owner in a national specialty pharmacy consortium, Excelera, for limited-distribution drug (LDD) access
- \$2.5M in savings for patient advocacy

Startup to Current: Lessons Learned

- Growing trend of importance of specialty drugs – 1-2% of the population comprises 50% of the pharmacy spend

Strategic Direction

- Hemophilia Service Line
- Ambulatory Infusion Services
- BFP-Specialty Network Payer Plan
- Specialty Pharmacy Operations
- Specialty Pharmacy Provider Support

Excellence in Specialty Pharmacy

Making healthcare easier so life can be better!

Utilization Management

Plan Design

- Drive standardization to formulary
- Review utilization criteria
- Leverage manufacturer dollars where possible

Intracase UM

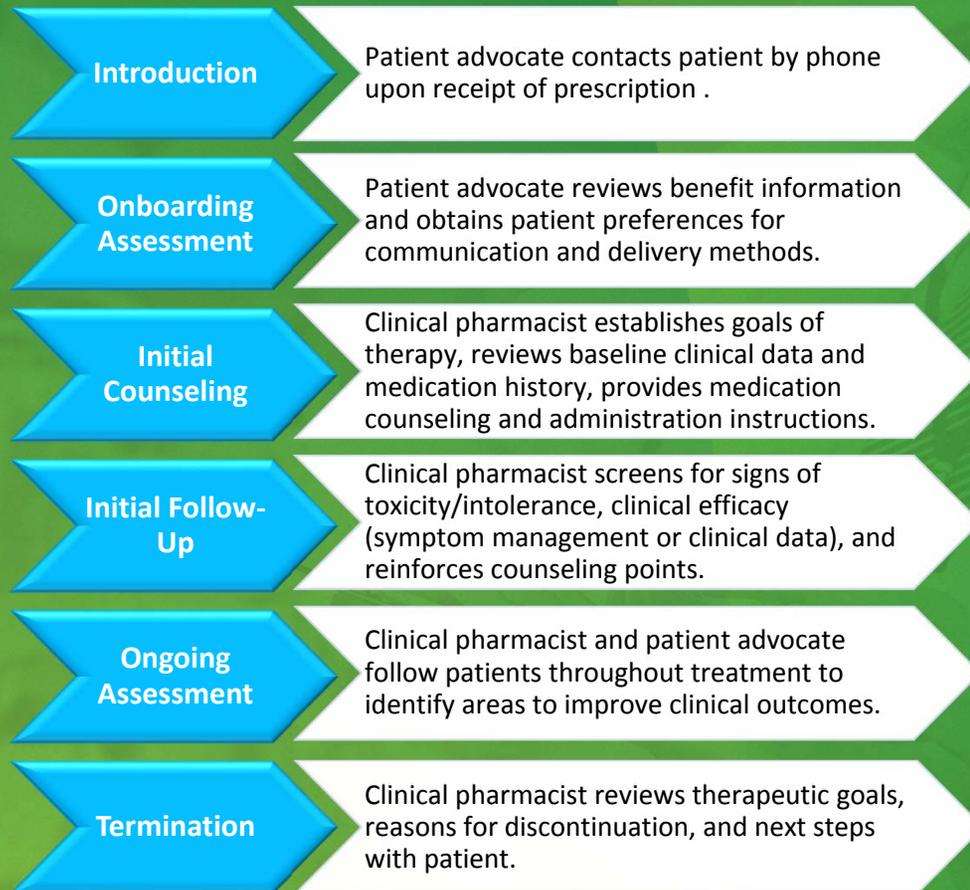

- Duration of therapy
- Dose de-escalation
- Adjust dispenses based on adherence

Consultative Partnership

- Recommend formulary exceptions that result in overall savings
- Address market trends and recommend formulary or benefit adjustments

Patient Centered Care

- ✓ Balance high-touch specialty pharmacy model with patient preference.
- ✓ Rapid turn-around times
 - Patient contacted within two hours of receipt of prescription
 - Medications shipped within one business day of PA being completed

Patient Advocacy

Coordination of Benefits

- Research eligibility and coverage
- Coordinate with multiple payers
- Facilitate and expedite prior authorization

Leverage Financial Assistance

- Manufacturer copay assistance
- Manufacturer drug replacement
- Foundation resources

Collaborative Benefit Design

- Review specialty pharmacy benefit
- Design benefit/advocacy activities to optimize all sources of support

Large, Self-Insured Employer

Financial Assistance Per Rx	\$125/Rx
Financial Assistance Per Member	\$1.04/PMPM

Banner Family Pharmacy-Home Delivery

Benefits to Banner

- New revenue generation and integrated care for Banner service sites
- Convenience, access and keeping employee spend inside Banner

Current Operations

- Home delivery capture is 20% of employee prescriptions
- High-tech robotic operation and comprehensive fulfillment, shipping and logistics infrastructure

Startup to Current: Lessons Learned

- PBM controls Home Delivery for external payers; no opportunity to transition BHN patients without a contract

Strategic Direction

- Home Delivery Service Expansion

Managed Pharmacy Solutions (MPS) – Business Line Strategy

Manage drug spend/trend, member utilization and outcomes for plans where Banner provides pharmacy managed care

PBM Oversight and Management

- Clinical and operational program review
- Audits, Market Check and Market Bid

Payer Population Health

- Clinical intervention through Population Health and embedded clinic pharmacist strategies
- Provider outreach and education

Payer Relationships with Financial Risk

- Collaboration on cost/quality programs
- Plan design (clinical and operational) collaboration

Business Development

- Provide PBM services within risk model

Data Analytics

- Consistent collection of pharmacy data
- Actionable reporting and measuring outcomes

PBM Inherent Misalignment with Payer Interests

Fee for service model – misaligned with payer goals of pharmacy cost management

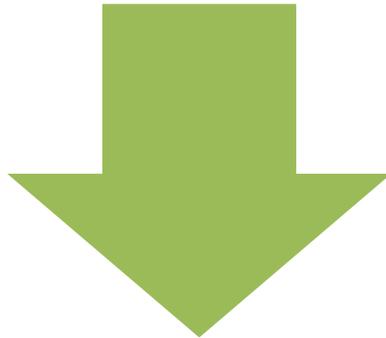

Traditional PBM vs. Integrated PBM

Why an Integrated PBM Approach?

Fast Fact:

- *A traditional PBM does **NOT** take financial risk*

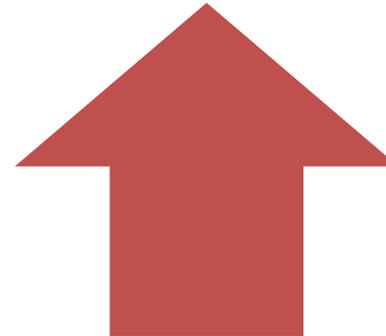

Traditional PBM (ESI, CVS) Goals

- Increase claim volume
- Increase home delivery margin
- Increase specialty margin
- Increase rebate margin
 - Push to higher cost products

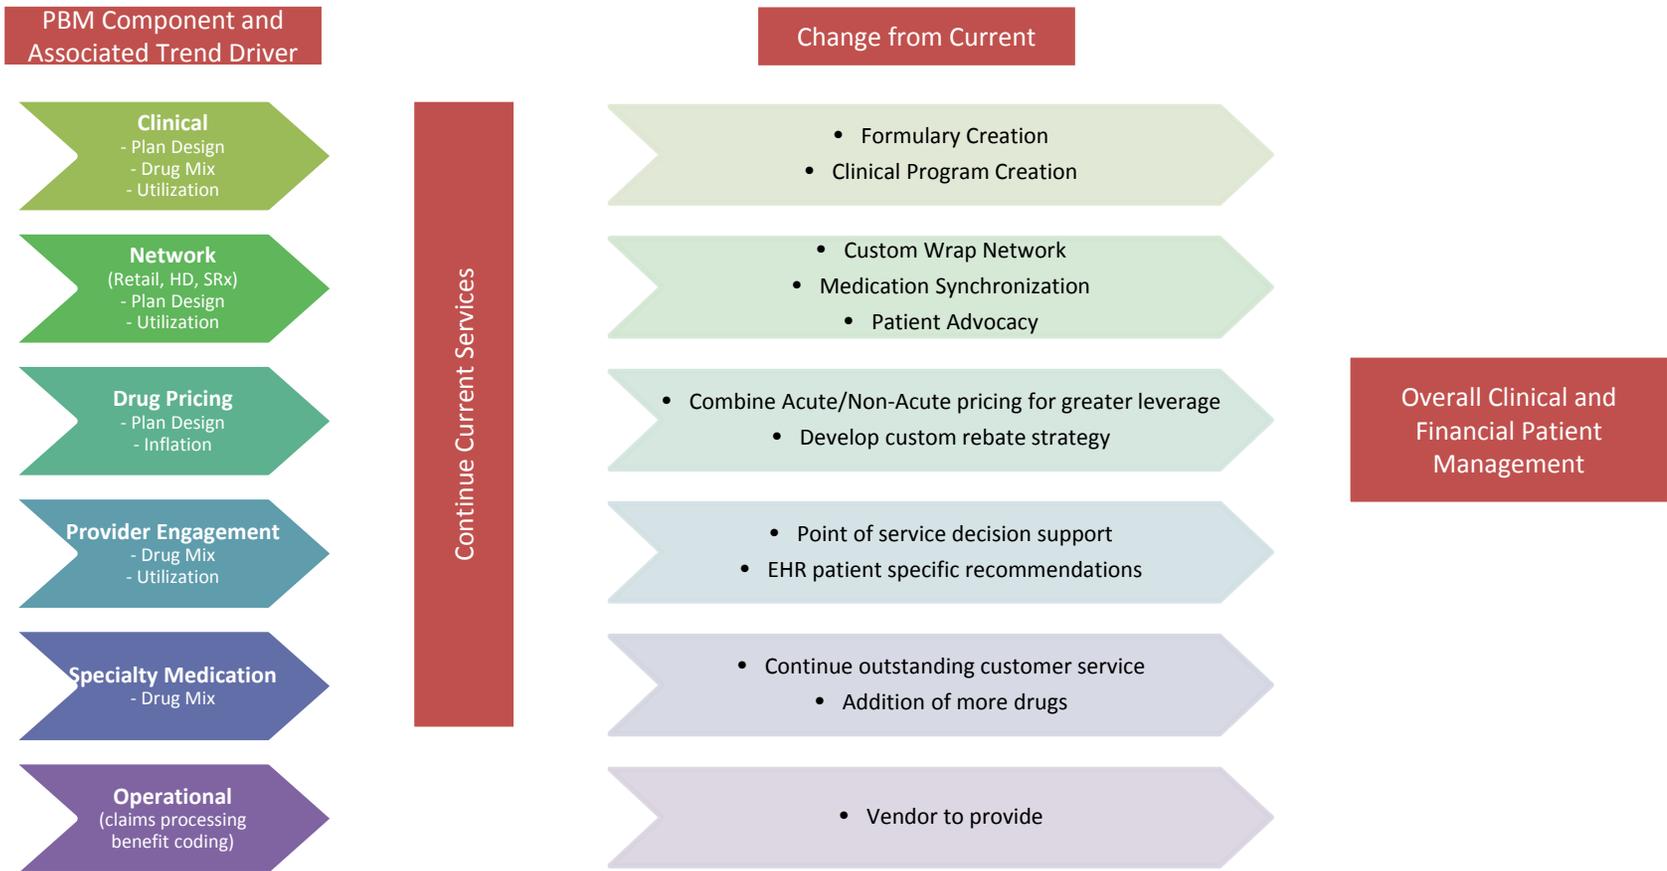

Integrated PBM Goals

- Low unit cost
 - Desirable in the marketplace
 - Lower out of pocket costs for members
- Flatten cost increase trend line
 - Improves profitability
- Improve patient outcomes through quality care

Vision for Managed Care Pharmacy

Take control of current PBM functions where Banner can better manage financial and patient management

Infusion Services System Oversight Strategy

System Infusion Services Oversight Committee

- Enterprise approach
- Guide decision-making
- Review scorecard and recommend follow-up
- Review external pressures and recommend actions

Analysis of Current State

- Patient Benefit investigation and prior authorization
- Patient financial assistance
- Medication charge practices
- Payment reconciliation

Develop Performance Standards

- Financial performance
- Operational performance
- Clinical / patient safety metrics

Site of Service Strategy

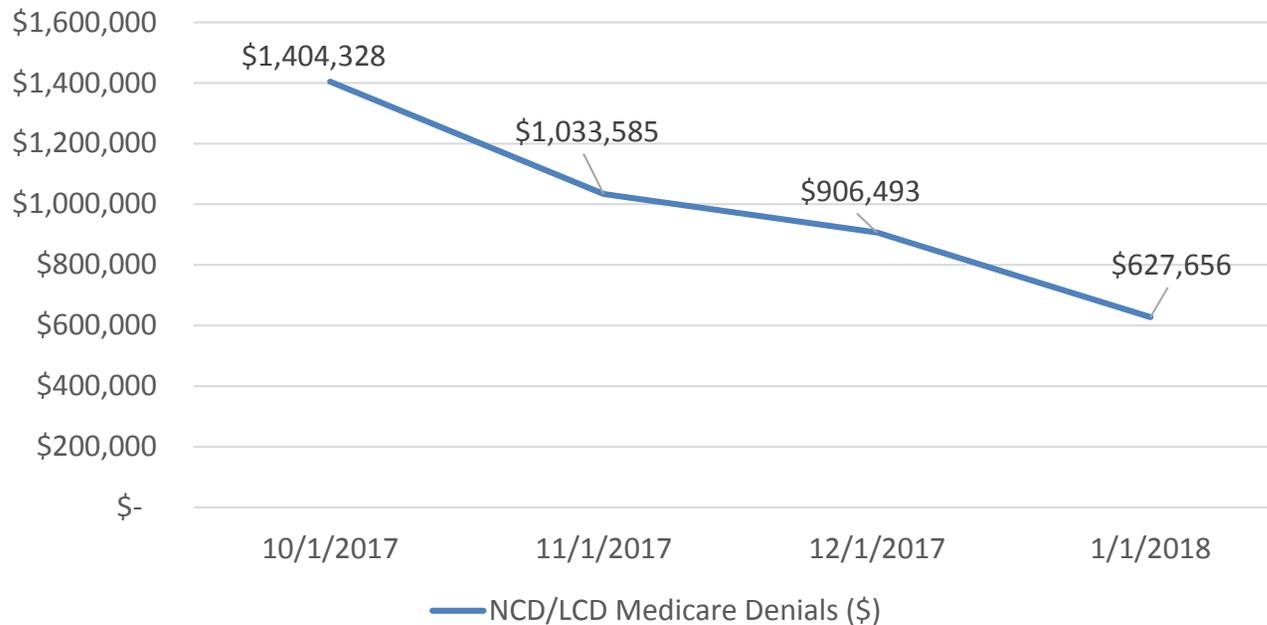

- Triage patient to appropriate site of care
- Payer contracting strategy
- Workflow optimization within and between each site of care

Impact of New Patient Intake Workflow

BANNER THUNDERBIRD MEDICAL CENTER

Ambulatory Infusion Services Performance

NCD/LCD Medicare Denials (\$)

Drivers:

- Multidisciplinary denial management team
- Individual review of each denial with resolution prior to next infusion
- Learning leveraged to avoid future denials

Ambulatory Infusion Services Performance

Success in decreasing NCD/LCD denials at BTMC ATU

- Organized monthly standing meeting
- Attended by Nursing, PFS, pharmacy and scheduling
- Pilot showed great success at BTMC
- Implemented across infusion centers in 1/2018

BTMC Outstanding NCD/LCD denials

	10/27/17	12/31/17
Total # Accounts	18	3
Billed Charges	\$203k	\$12K

NCD/LCD denials are commonly fixed by asking referring physician for a more specific diagnosis (e.g. moderate persistent asthma, uncomplicated vs. asthma)

Ambulatory Infusion Services Performance

A Reshaped Patient Intake Process

- ✓ Identified patient intake team
- ✓ PFS “specialists” working all infusion claims
- ✓ Improved reports to more accurately identify daily work queue
- ✓ Developed and trained staff on multiple tools and tip sheets addressing common questions
- ✓ Resource identified (Pharmacy Patient Advocates) to assist where patients are unable to pay

WPI Infusion LCD/NC Tool

The purpose of this tool is to provide a summary of the LCD and LCD-2D code listing for the most frequently used drugs that have a net reimbursement, to provide a list of additional CPT codes are charged with a HCPCS II code for an infusion (and to provide a list of Banner Policies that apply to LCD pre-claim creation workflow).

If you have tool questions, please contact Jeff Millard, Ambulatory Pharmacy & Shelly Gray, Revenue Integrity.

Definitions:

1. **Statutory Coverage Guidelines (NCD)**: Not-for-profit determination of whether Medicare will cover a form or service.
2. **Medical Coverage Policy (MCP)**: Private health care insurer that has been awarded a group/specialty jurisdiction to provide Medicare Part A and Part B (private Medicare Fee-For-Service (FFS)) beneficiaries.
3. **Local Coverage Guidelines (LCD)**: Decision by a MAC on whether to cover a form or service on a MAC-wide basis.
4. **HCPCS II Code**: Standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT codes.
5. **LCD-2D Diagnosis Code**: Administrative code to identify known diseases and other health conditions.

LCD Summary

Drug Name/Brand	Drug Name/Brand	HCPCS II Code	WPI (ICD-10)	LCD Diagnosis Summary
Amoxicillin	Amoxicillin (Amoxicillin)	J365	J3677	Variety of diagnoses. See tab titled J365 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin (Amoxicillin)	J369	J3677	Variety of diagnoses. See tab titled J369 J370 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J371	J3677	When "bacterial" is documented, it will not meet LCD pass checker. There are different types and the documentation must state the type of bacteria the patient has. See tab titled J371 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J372	J3677	When "breast cancer", "esophageal cancer", "stomach cancer", "lung cancer", etc. are documented, they will not meet LCD pass checker. The LCD requires the specific location of the cancer. Documentation Example: left lung lower lobe cancer.
Amoxicillin	Amoxicillin	J373	J3677	See tab titled J373 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J374	J3677	Variety of diagnoses. See tab titled J374 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J375	J3677	Variety of diagnoses. See tab titled J375 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J376	J3677	Variety of diagnoses. See tab titled J376 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J377	J3677	Variety of diagnoses. See tab titled J377 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J378	J3677	Variety of diagnoses. See tab titled J378 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J379	J3677	Variety of diagnoses. See tab titled J379 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J380	J3677	Variety of diagnoses. See tab titled J380 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J381	J3677	Variety of diagnoses. See tab titled J381 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J382	J3677	Variety of diagnoses. See tab titled J382 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J383	J3677	Variety of diagnoses. See tab titled J383 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J384	J3677	Variety of diagnoses. See tab titled J384 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J385	J3677	Variety of diagnoses. See tab titled J385 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J386	J3677	Variety of diagnoses. See tab titled J386 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J387	J3677	Variety of diagnoses. See tab titled J387 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J388	J3677	Variety of diagnoses. See tab titled J388 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J389	J3677	Variety of diagnoses. See tab titled J389 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J390	J3677	Variety of diagnoses. See tab titled J390 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J391	J3677	Variety of diagnoses. See tab titled J391 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J392	J3677	Variety of diagnoses. See tab titled J392 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J393	J3677	Variety of diagnoses. See tab titled J393 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J394	J3677	Variety of diagnoses. See tab titled J394 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J395	J3677	Variety of diagnoses. See tab titled J395 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J396	J3677	Variety of diagnoses. See tab titled J396 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J397	J3677	Variety of diagnoses. See tab titled J397 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J398	J3677	Variety of diagnoses. See tab titled J398 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J399	J3677	Variety of diagnoses. See tab titled J399 J368 for specific LCD-2D diagnosis code list.
Amoxicillin	Amoxicillin	J400	J3677	Variety of diagnoses. See tab titled J400 J368 for specific LCD-2D diagnosis code list.

Banner Health

Verbal Query Tip Sheet

1. It is within the scope of practice for an RN and Pharmacists to take an established diagnosis and query the physician on specificity.
2. The nurse must document the diagnosis, date and time of the verbal diagnosis from the physician and the physician must co-sign the documentation prior to bill submission in order for the diagnosis to be utilized for reimbursement purposes.

If you have any questions, please contact Shelly Gray, Revenue Integrity or Jeff Millard, Pharmacy Services.

The Road Ahead

Specialists performing benefit verification

- Site of service requirements are demonstrating the need for more “clinical” claim reviews
- Other health-systems have seen success through a centralized team performing benefit investigation

Develop relationship with managed care department

- Provide feedback on low paid claims to ensure contracts are adjusted as needed
- Collaborate to guide formulary decisions at the facility level

Produce operational scorecard

- Infusion drug cost updated monthly for each facility
- Include meaningful metrics to gauge business health and guide growth (infusion volume, top 10 infusion drugs, open chair time)

Business Operations

Benefits to Banner

- Clear alignment with Community Delivery strategy
- Develop a standard, scalable business operating model
- Partner with dedicated Corporate infrastructure resources
- Documentation of value-based performance

Current Operations

- Integrated division with centralized reporting and system-wide leadership
- Comprehensive pharmacy compliance program
- Pharmacy-specific member experience survey
- Pharmacy data mart in the EDW
- BPS Scorecard

Startup to Current: Lessons Learned

- Startup company to profitability necessary in 3 years

Strategic Direction

- Business Development Strategy
- Medication Safety Structure
- Risk Assessment Process with Internal Audit/Compliance
- Financial Reporting by Business Line
- Positions and Compensation Model

Thank You!
