COVID-19 System Vaccination Team

November 23, 2020

OchsnerHealth

COVID-19 Vaccine Taskforce

What We Know "New" Today:

- Over the weekend the FDA announced that it was scheduling a committee to review the EUA paperwork for **Thursday, December 10th.** That is our new "earliest" go live date would be the 11th (a Friday, possible approval to give everyone a weekend to prepare) or 14th (Monday).
- We anticipate much more limited supply at first than originally expected and essentially those at highest risk for prolonged exposures in areas with the highest census will be immunized first. There will likely be some nuisances across the system.
  - Each team DOP will receive notice when vaccine is in route to their campus
  - Each campus will need to be ready within 24 hrs. to stand up their clinic when notice of vaccine availability on their campus is received

System support for our vaccination teams

System resources

- Communication to Employees per CDC and LA directives
  - EM text message
  - MyO message
  - Email
- Build schedules
- Revenue Cycle- manage billing
- Reporting to state and CDC

Our teams

- Storage and logistics of product
- Scheduling prior to and check-in on the day of vaccination clinics
- Administer and document the vaccination

Answers to most frequently asked questions

- *What do I do if my facility's most exposed staff phase doesn't look like what we saw last week?*
- Are there existing freezers/refrigerators for the areas or do we need to purchase?
- Do the freezers/refrigerators have to be on a red plug tied into the generator system?
- Will there be a downtime process and/or paper form be available in case of technology failures?

What *IS* the process?

Epic Walkthrough

Richard Slaughter

System Team next steps:

- Send you Epic cost center department to me asap
- Gather your team
- Identify your method of vaccination
- Identify your location of vaccination
- Who will reconstitute the vaccine?
- Hold a mock clinic with all staff in the location.

END
